• **Identify the main idea of the text.** The main idea is the central message of the text. It is the most important information that the author wants to convey. To identify the main idea, look for the following:

- The title and subtitle of the text.
- The introduction and conclusion of the text.
- The headings and subheadings of the text.
- The first and last sentences of each paragraph.
- The key words and phrases that are repeated throughout the text.
- The overall tone and purpose of the text.

• **Summarize the text.** A summary is a brief statement of the main idea and the most important details of the text. To summarize the text, follow these steps:

1. Read the text carefully and identify the main idea.
2. Identify the most important details that support the main idea.
3. Use your own words to state the main idea and the most important details.
4. Check your summary against the original text to make sure it is accurate.

• **Answer the questions.** After reading the text, answer the following questions:

- What is the main idea of the text?
- Who is the author and what is the purpose of the text?
- What are the key points or details in the text?
- How does the text relate to the world around us?
- What are the strengths and weaknesses of the text?

113. *Leucosia* (Leucosia) *leucostoma* (Fabricius) (Fig. 113)

1. **What is the primary purpose of the study?**
The primary purpose of the study is to evaluate the effectiveness of a new treatment for hypertension. The study is a double-blind, randomized controlled trial comparing the new treatment (Drug A) against a placebo (Drug B). The study is being conducted in multiple centers across the country.

2. **What are the inclusion and exclusion criteria for the study?**
The inclusion criteria for the study are: (1) patients aged 18-65 years with a systolic blood pressure of 140 mmHg or higher; (2) patients who have not previously taken any antihypertensive medications; (3) patients who are willing to participate in the study and provide informed consent. The exclusion criteria for the study are: (1) patients with a history of drug allergies; (2) patients with a history of cardiovascular disease; (3) patients who are pregnant or lactating.
